

Figures planes

Le carré

$$\text{Périmètre} = c \times 4$$

$$\text{Aire} = c^2$$

Le rectangle

$$\text{Périmètre} = (L + l) \times 2$$

$$\text{Aire} = L \times l$$

Le triangle

$$\text{Périmètre} = a + b + c$$

$$\text{Aire} = \frac{c \times h}{2}$$

Le trapèze

$$\text{Périmètre} = a + b + c + B$$

$$\text{Aire} = \frac{(B + b) \times h}{2}$$

Le parallélogramme

$$\text{Périmètre} = a + b + a + b$$

$$\text{Aire} = b \times h$$

Le cercle

$$\text{Longueur du cercle} = d \times \pi \text{ ou } 2 \pi r$$

$$\text{Aire du disque} = \pi r^2$$

Solides

Le cube

$$\text{Volume} = a^3$$

$$\text{Aire totale} = 6 \times a^2$$

Le pave droit

$$\text{Volume} = a \times b \times c$$

Le prisme

$$\begin{aligned} \text{Volume} &= \text{Aire de la base} \times h \\ \text{Aire latérale} &= \text{périmètre de la base} \times h \end{aligned}$$

Le cylindre

$$\text{Volume} = \pi r^2 h$$

$$\text{Aire latérale} = 2 \pi r h$$

La pyramide

$$V = \frac{\text{Aire de la base} \times h}{3}$$

Le cône

$$V = \frac{\pi r^2 h}{3}$$

La boule

$$\text{Volume} = \frac{4}{3} \pi r^3$$

$$\text{Aire de la sphère} = 4 \pi r^2$$
